

# SVT Smart Vent Technology

*With Perimeter Dual Air Guard*

**CADDY**  
CORPORATION

# NEW SVT Smart Vent Technology

- Stops cooking effluent and heat from penetrating the hood canopy into the cool kitchen working area
- Perimeter down blast air curtain with horizontal powers slots
- Greatly reduces CFMs up to 30% over traditional ventilation
- Saves in conditioned air cost and overall kitchen energy expenses
- Available in all Caddy hood models
- Works in 24" tall foot print
- Can be configured with island or wall mount canopies
- Works with all types of cooking appliances, even larger or double stacked units
- Easy to install, no extra duct work required

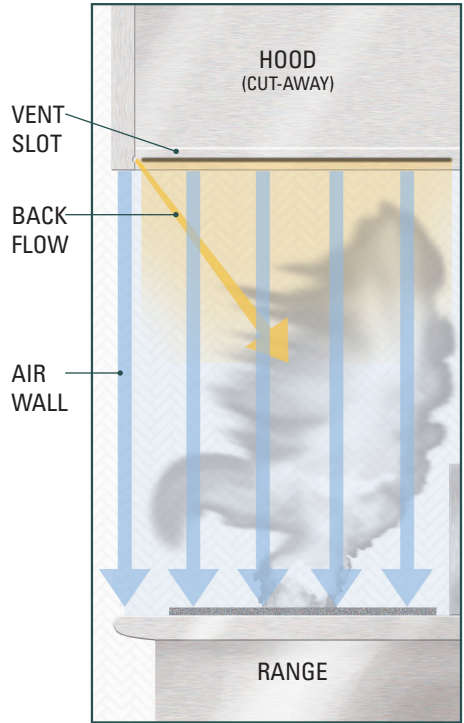

Image showing SVT smart vent technology working as smoke and effluent are created by stove. The downward air holes create a curtain keeping the smoke under the canopy while the perimeter power slot pushes the grease laden smoke toward the back of the hood into the filters.
