Renovation Confirmation

Job: _____

Date: _____

Facility Contact: _____

Phone#: _____

Fax#: _____

With thanks, we hereby confirm your order. Be assured that we will adhere to Caddy's high standard of workmanship and materials.

In order to complete the work as expeditiously as possible and with the least inconvenience to your facility. Please see the attached paperwork.

If we can be of any assistance, please contact the Caddy Service Department at (856) 467-4222 extension 331.

JOBSITE RENOVATION

All renovation work is accompanied by some unpleasant working conditions. Among these are the following:

- There may be power cords on the floor. It may be necessary to use welding equipment that creates a dangerous arc. There can be dust and grinding dirt. There will be noise. These conditions can interfere with your normal operations.
- Necessary electric power must be supplied for our equipment (120 volts). A panel box should be within working proximity.
- All work will be performed during normal daytime working hours between the hours of 7:00 am to 5:00 pm.
- Equipment to be renovated will be inoperable until work has been completed. Actual time may vary due to working conditions or other unknown factors. Although length of time on the job is an estimate and actual time may vary, the price remains firm as quoted.
- When the job is complete, the Caddy service tech in charge will notify you and it will be your responsibility to inspect the job. The service tech will then demonstrate the equipment to you (where possible). At the completion of this inspection/demonstration please sign the Renovation Work Order, a copy of which will be given to you.

Please understand that when the job is complete there will be a break in period of approximately three weeks. During this time minor adjustments may require the attention of your maintenance personnel. Any major problems should be immediately reported to our service department whose phone number is (856) 467-4222 extension 331
