

Demand-Control Ventilation

Now that's a Smart Hood!

Being smart was never so easy! Our new **Smart Hoods** modulate kitchen exhaust and make-up air based on cooking demands – keeping profits in the kitchen and out of the airstream. Fan speeds automatically adjust as cooking activity increases and subsides, maintaining a clean, comfortable environment. The simple, fully-automatic, plug-and-play system works in conjunction with variable-speed fans and real-time temperature sensors to regulate airflow and decrease energy bills. Our user-friendly HMI touch screen mounts anywhere in the kitchen and can be pre-programmed to perform a multitude of options including pre-programmed start/stops, weekly scheduling, and UV control monitoring. A single Smart Hood system controls multiple fan drives, making it ideal for retrofits or a simple addition to new kitchen designs. Smart Hoods also reduce fan noise and fanbelt wear, while increasing HVAC life.

Additional Features & Benefits:

- Easy to install plug-and-play design
- Factory pre-programmed and tested
- 25% to 60% fan speed turndown capability
- Better than 50% reduction in fan energy
- Average HVAC energy savings of at least 25%
- Quick-detect thermal sensors
- HMI touch screen with enhanced graphics
- Auto start up/shut down
- Weekly scheduling
- Instant override with 100% exhaust mode
- Real time operation
- Monitors UV controls and most fire systems
- Integrates with most building management systems
- Can be mounted in UDS, wall or remote
- Full factory Warranty and Caddy technical support
- Contributes to sustainable design & LEED credits
- Qualifies for energy rebates and incentives in select states
